Price of accommodation and services related to accommodation

1. The price of accommodation is the payment of the standard price for the accommodation in the relevant dormitory, based on the valid price list of the provider, and prices for additional services. The price of services bundled with the accommodation is already included in the standard accommodation price, set by the valid price list of the provider.
2. The services bundled with the accommodation are specified as follows:
 - a) heating, supply of hot and cold water and electric power, and gas if available
 - b) change of bedclothes 2x per calendar month
 - c) cleaning of shared areas and disposal of house waste
 - d) reception services, while the downtime (i.e. temporary discontinuity of service) due to failure or force majeure doesn't entitle the client for a discount from the accommodation price.
3. Additional services include the use of the pre-installed internet terminal socket, use of the client's own appliances, etc.
4. The price list of the accommodation provider is published on the official board of the dormitory, and on the provider's website www.kam.cuni.cz
