
Sustainable dormitories and refectories

Our ideas how to work towards green dormitories and refectories

Renewable energy:

- Optimization of ventilation and heating of building management systems
- Installation of automatic movement sensors to switch off lights in hallways
- Turn PCs off or into stand-by mode when idle
- Led lights in hallways

Gardening, landscape and biodiversity:

- Setting campus gardens with herbs and an insect hotel
- Flower meadow - our Butterfly meadow at Hvezda dormitory
- Planting new trees

Clean water:

- Water refill stations - at 17. listopad dormitory find out more [here](#) about year 2019
- Installation of water saving devices in toilets and taps

Recycling

- Recycle stations in each dormitory for waste recycling ([how to recycle find out here](#))

Transport

- Electric car at menza, for food delivery
